

*General Manager of Utilities
Brent Slover*

The Linton Water Department will be flushing fire hydrants beginning Sunday October 17th. The flushing will begin at 8:00 PM and last until 6:00 AM nightly. It is anticipated that the flushing process will require 5 nights to complete. Therefore, all flushing activities should be complete by 6:00 AM on October 22nd. During this process, customers may notice a discoloration of the water. It is recommended that clothes washing be kept to a minimum during this time as discolored water has been known to cause stains in white or light colored clothing. For additional information contact the Utility Office at 847-4971.
